

# Valery Anatolyevich Rubakov

## view from Yaroslavl

Department of Theoretical Physics  
P. G. Demidov Yaroslavl State University, Yaroslavl, Russia

International Conference on Particle Physics and Cosmology  
dedicated to memory of Valery Rubakov  
Erevan, Armenia, October 2–7, 2023

I am very thankful to Alexander Kuznetsov and Alexandra  
Dobrynina for the photos used in the talk

## 90-th last century

- It was 1994 when people from Yaroslavl group have got an invitation to take part in the Eighth International Seminar on High-Energy Physics “Quarks’94” in Vladimir
- It was the first meeting with Valery Rubakov for the majority of us
- Two years later, in 1996, this Seminar moved to Yaroslavl
- It was an outstanding event for Yaroslavl region at that time that more than 100 scientists all over the world involved in high energy physics and quantum field theory researches have visited Yaroslavl

## Quarks'96 in Yaroslavl

## Quarks in 2000-dths

- This continues in Suzdal (1998) and on Quarks in 2000-dths every even year until COVID'19

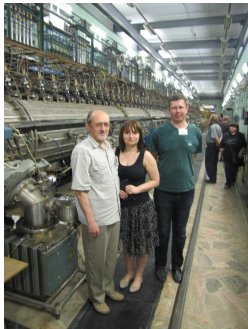

Quarks-2002, Novgorod & Valday

Quarks-2008, Sergiev Posad

## Participation in scientific schools

XVth International  
Baksan School  
“Particles and Cosmology”, 2011

ITEP Winter School 2013

7th Summer School  
of Modern Astrophysics,  
SAO RAS, Nizhnij Arkhyz, 2011

- Being a lecturer at scientific schools, V.A. Rubakov didn't forget about sport

## Dissertation councils

- V.A. Rubakov enters several dissertation councils, in particular, in Institute for Nuclear Research
- My colleagues and their PhD students got their PhD degrees in it
- He was a supervisor of the habilitation thesis by Lubov Vassilevskaya which she defended in Moscow State University in 1998
- It was also a pleasure for my colleagues to discuss their new results at the seminars of the Theory Physics Department of INR

Andrei Sergienko defence, March 6, 2014

We are sincerely sorry that

Valery Anatolyevich Rubakov

passed away in October 18, 2022
